

RAIN - WHERE DOES IT RAIN? WHY DOES IT RAIN?

(R)

Look at the picture below. This is the picture of a cloud moved along by the wind. This wind has blown across the Mediterranean Sea and now it is travelling across the land of Israel.

CAN YOU ANSWER THESE QUESTIONS?

1. This dark cloud over the Coastal Plain is full of water. Where did it get this water?
2. Why does the cloud drop the water on the plains and hillsides?
3. Why doesn't the wind bring rain or snow to the Jordan Valley?
4. Can you see any other place where the clouds do drop some rain?

GET READY TO REPORT TO YOUR CLASS

1. Make this same picture on a large piece of paper.
2. Use the large picture while you tell your class about why it rains in some parts of the Land of Jesus. Tell why it does not rain in other parts.
